Skills

- **Android:** Kotlin, Android SDK, Jetpack Compose, Material Design, Android Views, Navigation, ViewModel, Lifecycle, WorkManager.
- **Architecture:** Clean Architecture, SOLID, MVVM, MVI, MVP, modularization.
- **Async:** Kotlin Coroutines, RxJava.
- **Data & Networking:** Room, DataStore, Retrofit, OkHttp, GraphQL, REST APIs.
- **Dependency Injection:** Hilt, Dagger 2.
- **Testing:** JUnit, MockK/Mockito, Espresso, Kaspreso, Compose UI tests.
- **CI/CD:** CircleCI, AWS CodeBuild, Bash.
- **Backend & Cloud:** Node.js, GraphQL, MySQL, DynamoDB, AWS Lambda, S3, AWS CDK.
- **AI-Assisted Engineering:** Spec-driven development, agentic engineering workflows, Copilot CLI, Codex, Claude Code, Cursor, OpenClaw.

Certifications

- [AWS Cloud Essentials](#)
- [Getting Started with Deep Learning](#)

Languages

- English (Fluent) (both written & verbal)
- Ukrainian (Native)
- [Spanish\(A2\)](#)

Location

- València, Spain.

Profile

Senior Android Software Engineer with 5+ years of experience building enterprise POS and payment-related applications. Specialized in Kotlin, Clean Architecture, Android, hardware/peripheral/payment integrations, and AWS-backed services. Experienced in leading development teams, maintaining high-load enterprise applications, and improving software quality through automated testing and CI/CD. Proven ability to deliver solutions that drive business growth and operational efficiency.

Work Experience

HS-Soft

Senior Android Software Engineer

JAN 2024 - PRESENT

- Lead development and evolution of enterprise [Self-Order](#) and POS Android solutions, delivering features while adapting to evolving business, customer, and hardware requirements.
- Designed and delivered end-to-end features across Android applications and backend services using Node.js and GraphQL.
- Established and maintained automated quality assurance for the [CashAssist](#) platform, developing end-to-end, instrumentation, and unit tests to improve product stability and reliability.
- Led integration and certification of Sunmi and DIBAL weighing solutions for Android register systems, including hardware communication, protocol implementation, documentation, and WELMEC compliance.

HS-Soft

Lead Android Developer

Nov 2021 - Jan 2024

- Led Android development teams, coordinating stakeholders, delivery planning, technical reviews, and project execution.
- Designed Android libraries for EFT payment terminals and peripheral devices, integrating USB and TCP/IP communication with printers, smart cards, and payment hardware.
- Led major modernization initiatives, migrating RxJava to Kotlin Coroutines, XML to Jetpack Compose, and MVP to MVI architecture.
- Improved application performance, stability, and maintainability through architectural refactoring, modernization, and technical leadership.

HS-Soft

Android Developer

Dec 2020 - Nov 2021

- Built and maintained Android features for POS and enterprise applications, delivering new functionality and resolving UI and business logic issues to improve reliability.
- Contributed to application modernization through Material Design adoption, Firebase Cloud Messaging integration, and architecture improvements.

EDUCATION

- Polish-Japanese Academy of Information Technology (Warsaw) 2018-2020
- Drahomanov National Pedagogical University (Kyiv) 2020-2021
